Text Responses

Question: What books/readings were most beneficial? Why
 all of them
 Test

Question: What did you appreciate most and what suggestions do you have
 time with other students
 Test

Question: Comments on student prepared for class
 Test

At the top of the page are the numeric results from the questions. You can see the class average as well as the university and college average.

At the bottom of the page will be any comments that the students provided. Students are allowed to comment on all questions, and there are additionally two questions on which the students only comment.

If you wish to print the results, click on the Excel icon X at the top of the question list.

Although it is an Excel icon, you can choose to send the result to Word or a pdf file. Select what kind of output you want and then click the Export button. A new document will open. After you are done with this report, close the window and you'll be back at your list of courses.

Note: For Statistics and Percentile Rank, a value of n/a means that Statistics and Percentile Rank information is not available for this question. This is most likely because the question was of a demographic nature, and thus, numeric values do not apply. A value of *ID means that there was insufficient data to compute Percentile Rank information.
